"AN INJURY TO ONE IS AN INJURY TO ALL

10-YEAR PLAN CONTINUES

Postmaster General Luis De Joy has left the Service, but his legacy remains. The *10 -Year Plan* and it's impacts on our facility persist under the leadership of the new PMG David Steiner.

Some of the developments of which we are aware are:

The Bulk is expected to reopen by October in anticipation of peak season, with one-half of the new MARS machine up and running and the second half to be installed in 2026, some machinery will be removed from foreign/Military into the bulk still to be determined. In September, the NDC is scheduled to become a Regional Processing Distribution Center (RPDC), affecting our relationship to other facilities and personnel in the area. By early next year more Mailhandlers are expected to be excessed to the RPDC.

But, in the meantime, Tour 1 STC (3am) hours are changing to 11PM-7:30AM.

For information on the inevitable bid postings that will accompany these developments, consult Management's posting and the official Branch Website. The address is on this newsletter masthead.
