

work, every day we see The Mars Machine and The Pils Machine becoming more and more complete.

What may have seemed impossible to foresee over 6 months ago is coming more to fruition day by day. We can now begin to see light at the end of the tunnel, BIDS for these machines will be coming in the near future and I will keep you updated on any developments.

UPDATE ON RETREAT RIGHTS

I know many members are inquiring about Retreat Rights to the Bulk Building. I am currently in continuing discussions with upper management in determining which employees will be afforded retreat rights to the Bulk Building, prior to the newly created bids being posted in April. At this time, these discussions are focused on South Container. Once that area is completed, there will be further meetings regarding other areas in The Bulk. I will keep you updated on any future developments.

Please monitor our website for any upcoming bids at
